

# TWO HANDLE KITCHEN FAUCET VALVE CARTRIDGE REPLACEMENT GUIDE

**BEFORE YOU BEGIN YOUR INSTALLATION:**

**Traditional Model #s 8010-12, 8010-18, 8020, 8030**

Turn off water supply.

**REQUIRED TOOLS:**

Phillips Screwdriver

Needle Nose Pliers

15mm Socket Wrench

**1.** Locate notch at bottom of handle button (A). Pry off handle button with finger nail or small standard screwdriver. Remove handle retaining screw (B) and star washer (C).

**2.** Remove handle (D) by pulling straight out. Unscrew and remove adjusting nut (E) from valve sleeve (F).

**3.** Remove pressure disk (G), brake pad (H1), brake disk (J), brake pad (H2), thrust washer (K) and wave spring (L).

**4.** Using a 15mm socket wrench, remove old valve cartridge (M).

**5.** Using a 15mm socket wrench, install new valve cartridge. Tighten until snug. **DO NOT OVERTIGHTEN.**

**NEW CARTRIDGE**

**6.** Insert in order - wave spring, thrust washer, and one brake pad.
